

Questions and Answers

Domestic Violence Intervention (DVI) - 2022

The deadline for receipt of written questions is **closed**.

Q1. In the new AmpliFund budget section, there is no location to put indirect cost requests. Where is this entered?

A1: Put indirect costs in the *Other* budget section. If your entity has an approved federal rate, you may use that, otherwise the maximum rate should be the de minimus approved by the 2 CFR 200.

Q2. Is there an error in cell B41 of the Financial Disclosure Template?

A2. You are correct, there is an error in the Financial Disclosure spreadsheet. We are unable to change the spreadsheet that is attached to the RFP. This spread sheet has no bearing on the scoring of your grant as long as it is completed. Please fill out the form and attached it to your submission.

Q3. Can we use a cost application plan based on % cost of DVI project as related to total budget rather than square footage, particularly if our physical space is not separated among different projects?

A3. All cost allocation plans must be based in fact. Budgeted amounts are not facts so it is unallowable.

Q4. Could the allocation be based on previous year's % DVI to total expenses?

A4. Yes, provided you mean prior years actual DVI expenses compared to the entity's actual total expenses.

Q5. Why did you select 'Non-Grant Funded' for each line item?

A5. I do that as a personal preference when setting up each line item budget. I view it as giving me more control over each item. If you know that a budgeted line item will not be providing match you do not need to select "Non-Grant Funded."
